Thermasorb Absorbent Pads 141x64

General Description

An absorbent pad using Sodium Polyacrylate Super Absorbent Powder encapsulated between a sheet of polyester film and a non-woven fabric. It is placed in the bottom of tray, fabric side down. When blood or other unwanted water-based liquids contact the fabric it “wicks” the liquid into contact with the Super Absorbent Powder. The liquid contacts the powder and is strongly attracted to it, forming a harmless damp gel. The gel particles are too large to pass back through the fabric.

Uses

Absorption of unwanted water-based liquids primarily in wrapped food trays.

How to Use

Place in base of container where liquid will collect, fabric side down.

Identification

The Thermasorb Absorbent Pad has a white polyester film on one side and is formed into two cells. The other side is a white non-woven fabric. It measures 141mm x 64mm.

Technical Specifications

Trade Name	Thermasorb Absorbent Pads 141x64
Carton Label	Thermasorb Absorbent Pads Size: 141x64 Qty: 4200
Size	141mm x 64mm
Packed Form	3 Perforated Pads
Cells Per Pad	2 cells
Perforations	None
Quantity per Carton	4200 pads
Absorbency Fresh Water	70ml
Absorbency .9% NaCl	47ml
Carton Dimensions	37cm x 37cm x 33cm
Carton Weight	10.3kg
Main Benefits	Locks away free liquid from bacteria for improved presentation and hygiene
